

Health Profile 2018

Kalkaska County

2018 Health Profile

Kalkaska County

The 2018 Chartbooks provide a snapshot of the health status of the District Health Department #10 jurisdiction. Information is presented by county and when available, comparisons are made to the jurisdiction, to Michigan, and to Healthy People 2020 Objectives.

Data include population, education, race, births and deaths, incidence of disease, injuries, and immunizations. Last year, a Behavioral Risk Factor Survey was conducted in the entire 10 county jurisdiction by an independent research and evaluation firm. This random telephone survey reached between 350 to 622 residents in each county for a total number of respondents of 4,699. A wide range of health behaviors were included:

- Health status indicators, such as perception of general health, satisfaction with life, weight (BMI), and levels of high blood pressure.
- Health risk behaviors, such as smoking, drinking, diet, and physical activity
- Clinical preventative measures, such as routine physical checkups, cancer screenings, oral health, and immunizations
- Chronic conditions, such as diabetes, asthma, and cancer

In addition, DHD#10 is completed the Community Health Improvement Plan in 2017. The identified strategic issues are:

- · Access to Health Care
- Tobacco Use
- Substance Abuse
- Healthy Lifestyles
- Health Disparities
- · Maternal, Infant & Child Health
- · Mental Health
- Chronic Disease

Demographics

Demographics serve as an important indicator which can be used to disaggregate data to gain more detailed on specific sub-populations (i.e. ethnicity, sex, education level, etc.) and better tailor public health interventions.

Population

	Kalkaska	Michigan
Total Population	17,824	9,962,311
Population per square mile	30.6	174.8
Persons under 5 years	5.2%	5.8%
Persons under 18 years	21.0%	22.1%
Persons 65 years and over	20.2%	16.2%
Disability, under age 65	13.8%	10.4%
Gender: Females	48.8%	50.8%

Income & Economy

	Kalkaska	Michigan
Persons in poverty	17.1	15.0%
Median household income	\$43,431	\$50,803
Per capita income	\$22,822	\$27,549
Unemployment	6.9%	4.9%

Race, Ethnicity, & Household Characteristics

	Kalkaska	Michigan
White	96.0%	79.6%
Black	05%	14.2%
American Indian/Alaska Native	0.9%	0.7%
Asian	0.6%	3.1%
More than one race	2.0%	2.4%
Hispanic	2.1%	5.0%
Language other than English spoken at home	2.8%	9.3%
Persons per household	2.45	2.51
High school graduates	86.6%	89.9%
Bachelor's degree or higher	12.5%	27.4%

MDHHS

Poverty + Poverty Indicators

Poverty is strongly linked to negative health outcomes, keeping track of poverty levels and identifying significant change can suggest a positive or negative change within the community.

Percentage of Population (0-17 years and all ages) Living in Poverty in Kalkaska County and MI, 2006-16

% of Students Eligible for Free or Reduced Lunch, 2016

Poverty + Poverty Indicators

Percentage of Children (0-4) Who Receive Women, Infant, and Children (WIC) Benefits in Kalkaska County and MI, 2006-16

% of Live Births Paid by Medicaid, 2015

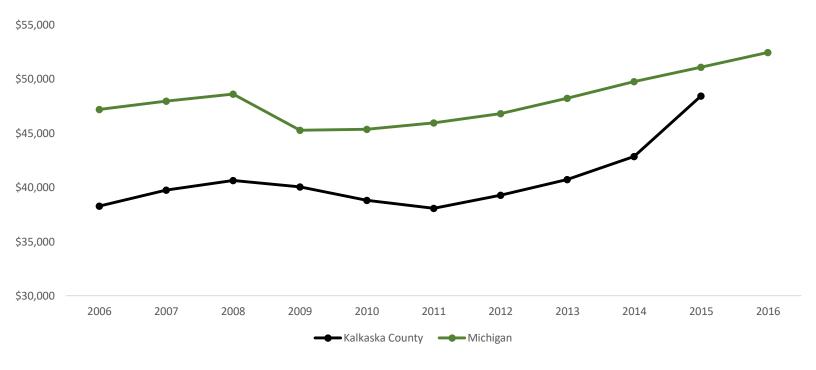

Economic Wellbeing

Economic wellbeing is a quick hint into the health of a community by providing indicators that focus on economic hardships. Studies have shown that those who live in poverty are at a higher risk for both acute and chronic diseases.

	Percentage of Adults who are Unemployed			Percentage of Children (0-5) with All Parents in the Labor Force		
2010	Kalkaska County	Michigan 12.5%		Kalkaska County	Michigan 66.0%	
2016	6.9%	4.9%		65.8%	66.4%

Immunization Snapshot

Immunization compliance is one of public health's greatest defenses against many communicable diseases. Our Immunization nurses work tirelessly providing education and vaccines from infants to the senior population.

Immunizations Key

- 4:3:1:3:3:1:4 includes 4 doses of DTaP, 3 polio, 1 MMR, 3Hib, 3 Hepatitis B, 1 varicella, and 4 PCV7/13. This is the percent of 19-35-month-old children who have received these immunizations.
- 4:3:1:3:3:1:4:2 includes the above vaccines with the addition of 2 doses of Hepatitis A. This is the percent of 19-35-month-old children who have received these immunizations.
- 1:3:2:3:2:1 includes 1 Tdap, 3 IPV, 2 MMR, 3 HepB, 2 Varicella, and 1 Meningococcal. This is the percent of 13-17-year olds who have received these immunizations.

Behavioral Risk Factor Survey Snapshot

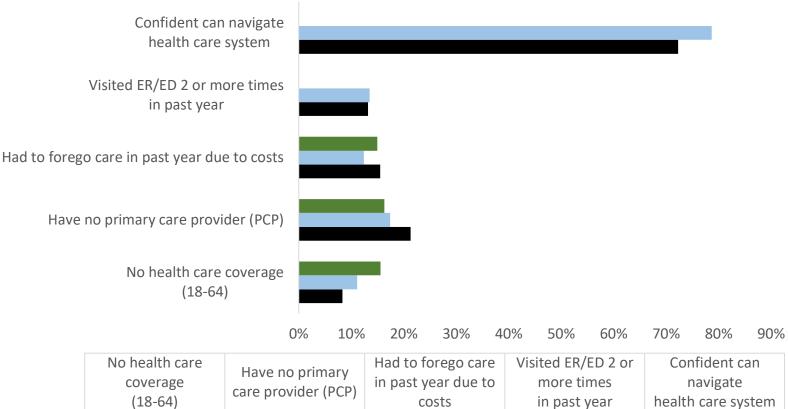

In 2013, DHD#10 hired an independent research and evaluation firm to conduct a regional Behavioral Risk Factor Survey to bolster our survey response rates to increase validity and to obtain comprehensive and inclusive survey results. The following geographic areas will be presented: DHD#10 Region, County Level, & Michigan. There will be some data sets with no Michigan comparison – this is due to DHD#10 adding customized questions to the BRFS.

The Michigan Behavior Risk Factor Survey is completed annually through randomized telephone surveys for Michigan residents 18+. The most recent Michigan Behavioral Risk Factor Survey Annual Table (2016) can be accessed here.

County Health Rankings

County Health Rankings is a collaboration between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. The County Health Rankings measure the health of nearly all counties in the nation and rank them within states. Below is an overall snapshot at the county level vs. all ranked counties (83 in total).

The most recent County Health Rankings (2019) can be accessed here.

Kalkaska C	Ranking (out of 83 counties)						
	Health Outcomes						
Represents how healthy a county is,	Length of Life	Premature death	69				
using factors of how long people live and how healthy they feel while they are alive (quality of life)	Quality of Life	Poor or fair health; poor physical health days; poor mental health days; low birth weight	33				
	Health Fac	etors	72				
	Health Behaviors	Smoking; obesity; food environment; physical activity; excessive drinking; alcohol impaired driving deaths; sexually transmitted infections; teen births	50				
Represents what influences the health	Clinical Care	Uninsured; ratios of physicians, dentists and mental health providers to population; preventable hospital stays; diabetic monitoring; mammography screening	55				
of a county	Social and Economic Factors	Education; unemployment; poverty; children in single-parent households; social associations; violent crime; injury deaths	72				
	Physical Environment	Air pollution; drinking water violations; severe housing problems; driving alone to work and long commute	39				

Conclusions: Behavioral Risk Factor Survey

Behavioral Risk Factor Survey Findings

The district-wide BRFS findings show both **strengths** and **opportunities** for improvement in the health status of our communities

Strengths

- Most enjoy good to excellent general health, physical health, and mental health
- Adequate social and emotional support
- Large majority have health care coverage and a primary care provider (PCP)
- Most have had no problems receiving needed medical care
- · Binge drinking lower than Michigan and US
- · Most buy fresh fruits/vegetables locally and feel fresh produce is readily available in their community
- Strong majority have routine physical checkups and health screening/tests, such as mammograms
- Vast majority receiving information on how to manage diabetes, heart attack, angina/CHD, COPD
- Majority of adults aged 65+ immunized against pneumonia and flu

Opportunities for Improvement

- DHD#10 area lags behind Michigan and/or US on most indicators measured
- One in five with fair to poor general health
- Physical health and activity limitation worse than MI
- Nearly one in three obese; one in three overweight but not obese
- Nearly three in ten are current smokers
- Prevalence of heavy drinking higher than MI/US
- Nearly one-third not engaging in leisure time physical activity
- Inadequate fruit/vegetable consumption
- Three in ten have not visited the dentist in past year
- One in three have hypertension
- One in ten have diabetes; one in five over age 55 have diabetes
- Higher prevalence than MI and/or US on chronic conditions such as asthma, heart attacks, heart disease, and cancer
- Nearly one-third have high cholesterol

Conclusions: Community Health Improvement Plan

KALKASKA COUNTY

TOP 3 HEALTH ISSUES Identified by Key Stakeholders

Chronic Disease Strategy Progress	
Collaborate with the Northern Michigan Diabetes Prevention Program Collaborative	
Partner with non-traditional agencies to reach vulnerable populations, i.e. Community Mental Health, Dept. of Health and Human Services	
Healthy Lifestyle Strategy Progress	
Partner with Shape Up North to implement obesity prevention initiatives	
Partner with the Northern Michigan Public Health Alliance to implement the Community Health Innovation Region Obesity Prevention Plan	•••
Partner with the Kalkaska Memorial Health Center to implement strategies included in the Munson Healthcare Obesity Prevention/ Reduction Plan	
Increase communication among partner agencies to avoid duplication of efforts to increase collective impact	
Tobacco Use Strategy Progress	
Partner with the Live Well Kalkaska Substance Free Coalition and the Kalkaska Memorial Teen Health Corner to provide tobacco prevention programming to youth	
Partner to promote the use of Towards No Tobacco curriculum for 6th grades students and the Fourth R Program for high school students	
Assist with planning and implementing youth driven tobacco prevention events for Great American Smokeout and Kick Butts Day
