

COVID-19 Crawford County Monthly Summary – September 2020

The purpose of this monthly summary is to provide you with more information regarding cases referred to the health department over the past month. Information is obtained through the Michigan Disease Surveillance System (MDSS). Data provided is for confirmed cases only unless otherwise noted as probable.

There was a decrease in confirmed COVID-19 cases this month.

More than half of the cases were symptomatic during their course of illness.*

Please note: Symptomatic and Asymptomatic are both contagious

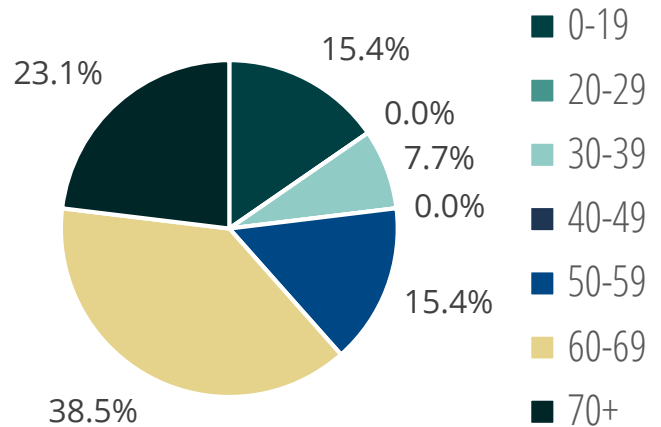

The most common symptom was fatigue, lethargy, and weakness.

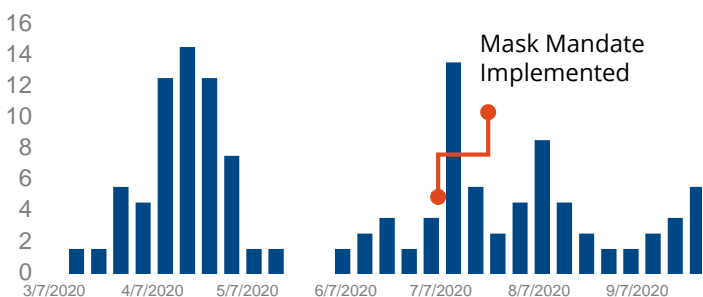

Known source of exposure has been identified for less than half of the cases.

- 1 case is associated with a named outbreak
- Of those unassociated with an outbreak, 1 case is a household contact meaning they are connected to another positive COVID-19 case within the same household

Age Breakdown
