

COVID-19 Jurisdiction Wide Monthly Summary – November 2020

The purpose of this monthly summary is to provide you with more information regarding cases referred to the health department over the past month. Information is obtained through the Michigan Disease Surveillance System (MDSS). Data provided is for confirmed cases only unless otherwise noted as probable.

There was an increase in confirmed COVID-19 cases this month.

Half of the cases were symptomatic during their course of illness.*

Please note: Symptomatic and Asymptomatic are both contagious

Of those with symptoms, the most common symptom among all cases was fatigue/lethargy/weakness.

Known source of exposure has been identified for less than half of the cases.

- 353 cases are associated with a named outbreak connected to K-12 schools, colleges, healthcare workers, long-term care facilities, social gatherings, churches, farms, and worksites
- Of those unassociated with an outbreak, 250 cases are community contacts meaning they are connected to another positive COVID-19 case not within the same household
- Of those unassociated with an outbreak, 508 cases are household contacts meaning they are connected to another positive COVID-19 case within the same household

Race of Total Confirmed Cases

American Indian/Alaska Native, Native Hawaiian/Pacific Islander, and Asian account for 0.6% of total cases
