

Approved Enhanced Treatment Systems

District Health Department #10

Updated April 2013

The following list is the most common forms of enhanced treatment. Other systems may also be used if approved by the program coordinator. All systems must be installed in accordance with manufacturer's specification. Use of alternative treatment systems in subdivisions or site condominiums must be approved by the program coordinator prior to issuing a permit.

No Engineer Required

White Knight Waste Treatment

SludgeHammer

www.SludgeHammer.net

Engineer Required

Note: In some cases the manufacturer of the systems has provided training and has certified a specific contractor to design and install a unit without the use of an engineer. In such a case, the sanitarian may waive the requirement for an engineer.

Nibbler System
