

# COVID-19 Jurisdiction Wide Monthly Summary – March 2021

The purpose of this monthly summary is to provide you with more information regarding cases referred to the health department over the past month. Information is obtained through the Michigan Disease Surveillance System (MDSS). Data provided is for confirmed cases only unless otherwise noted as probable.

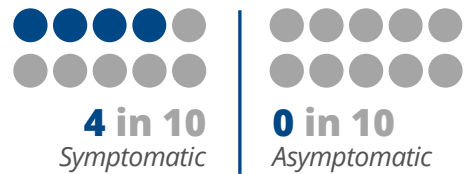

**There was an increase in confirmed COVID-19 cases this month.**

**Known source of exposure has been identified for less than half of the cases.**

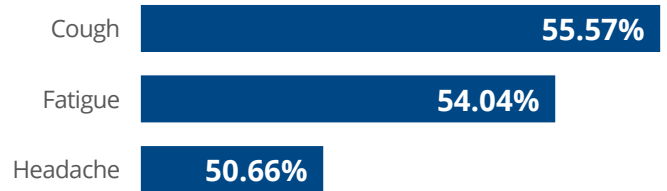

- 233 cases are associated with a named outbreak connected to school, care facilities daycare/preschool, worksites, jails, religious services, restaurant, sports team, bar and college
- Of those unassociated with an outbreak, 103 cases are community contacts meaning they are connected to another positive COVID-19 case not within the same household
- Of those unassociated with an outbreak, 303 cases are household contacts meaning they are connected to another positive COVID-19 case within the same household

**Less than half of the cases were symptomatic during their course of illness.\***

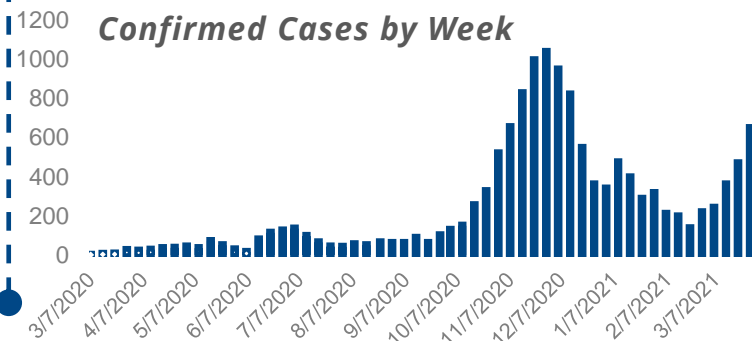

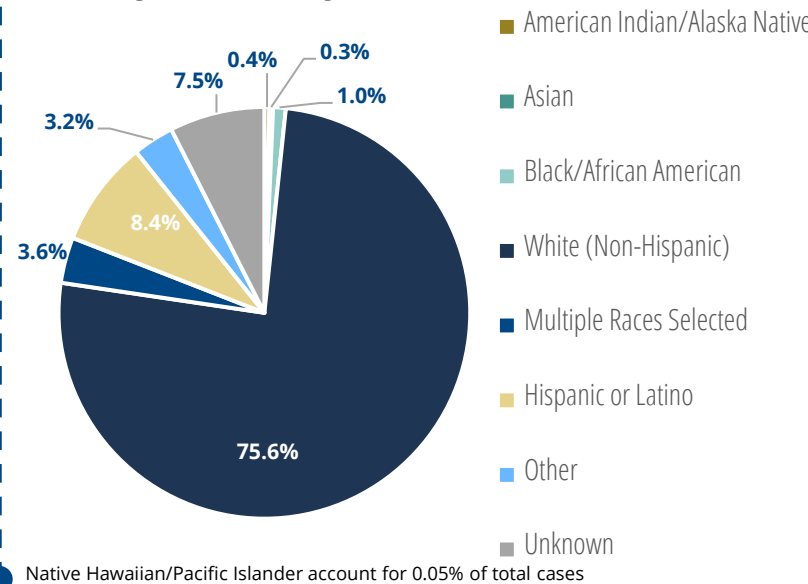

Please note: Symptomatic and Asymptomatic are both contagious

**Of those with symptoms, the most common symptom among all cases was cough.**

**Race of Total Confirmed Cases**
