

COVID-19 Mecosta County Monthly Summary – November 2021

The purpose of this monthly summary is to provide you with more information regarding cases referred to the health department over the past month. Information is obtained through the Michigan Disease Surveillance System (MDSS). Data provided is for confirmed cases only unless otherwise noted as probable.

There was an increase in confirmed COVID-19 cases this month.

Less than half of the cases were symptomatic during their course of illness.*

Please note: Symptomatic and Asymptomatic are both contagious

Of those with symptoms, the most common symptom was cough.

Known source of exposure to another positive COVID-19 case has been identified for less than half of the cases.

- 35 cases are associated with known outbreaks connected to schools, college, and care facilities
- 14 cases are community contacts meaning they are connected to another positive COVID-19 case not within the same household
- 50 cases are household contacts meaning they are connected to another positive COVID-19 case within the same household

Confirmed Cases by Week
