

DISTRICT HEALTH DEPARTMENT #10 SUPPORTS NATIONAL BREAST CANCER AWARENESS MONTH

October 18, 2022 – October is National Breast Cancer Awareness Month and District Health Department #10 (DHD#10) urges people to be aware of their personal risk factors for breast cancer, schedule themselves for annual Screening Mammograms, and if they have no insurance or have an insurance deductible, to call 888-217-3904 to see if they are eligible to enroll in the Breast and Cervical Cancer Control Navigation Program (BC3NP).

Knowing one's personal risk for breast cancer is critical for early detection and prevention of the disease. Risk factors can include being a woman, being older, and having changes in your BRCA1 or BRCA2 genes.

The good news is that there are ways to lower one's risk for breast cancer:

- Keep a healthy weight and exercise regularly
- Do not drink alcohol or limit the amount you do drink
- Quit smoking
- If you are taking hormone replacement therapy or birth control pills, ask your doctor about the risks
- Breastfeed your children, if possible

It is also important, if not more important, for individuals to schedule annual Screening Mammograms. A Mammogram is the best tool doctors have to find breast cancer early.

It is recommended that:

- Women should start talking to their health care provider about breast cancer screenings as early as age 40
- Women who are more at risk should begin screenings at age 40
- Women with an average risk of breast cancer – most women – should begin screenings by age 45
- All women should begin screenings at the latest, by age 50

DHD#10 urges program-eligible women to take advantage of and receive free cancer and health screenings through the BC3NP.

BC3NP provides free breast and cervical cancer screening services, statewide to income qualifying women. This may include follow-up care, if needed, if a screening abnormality is identified. If qualified and enrolled in the BC3NP, any women diagnosed with breast or cervical cancer may be eligible for a special Medicaid program called the Medicaid Treatment Act that pays for cancer treatment.

Not sure if you are eligible for the BC3NP program? A family of 4 can make up to \$69,375.00. Check to see if you are eligible here: <https://www.dhd10.org/men-women/cancer-screening/>.
