

COMMUNITY FIRST

ANNUAL REPORT
2022

***District Health
Department #10***
Healthy People, Healthy Communities

A MESSAGE TO YOU

On behalf of District Health Department #10, we are pleased to provide you with our 2022 Annual Report.

The theme for our report is “Community First”, as local public health finds itself at a cross-roads moving into 2023. COVID-19 continues to spread throughout our jurisdiction; however, pharmacological and non-pharmacological strategies are now widely available and known to assist individuals in protecting themselves from illness. As a result, local public health can direct more energy to other public health needs. During 2022, in addition to our standard tasks, we also addressed issues related to the national baby formula recall, finalized the DHD#10 Community Health Assessment Report, submitted an application for national re-accreditation, and planned for the restart of the MDHHS accreditation process, all while navigating workforce recruitment struggles and assuring a competent workforce. Yet, despite those challenges, District Health Department #10 continued to meet its responsibility of creating, maintaining, and fostering healthy communities within our jurisdiction.

As we progress through 2023, we recognize that many of the challenges we previously faced will continue to resurface and new challenges will be on the horizon. Through all this, District Health Department #10 remains committed to keeping our residents and communities safe and healthy!

To your health!

6 FUNCTIONS OF PUBLIC HEALTH GOVERNANCE

1

POLICY DEVELOPMENT

Lead and contribute to the development of policies that protect, promote, and improve public health while ensuring the agency remains consistent with the laws and rules to which it is subject.

2

RESOURCE STEWARDSHIP

Assure the availability of adequate resources (legal, financial, human, technological, and material) to perform essential public health services.

3

LEGAL AUTHORITY

Exercise legal authority as applicable by law and understand the roles, responsibilities, obligations, and functions of the governing body, health officer, and agency staff.

4

PARTNER ENGAGEMENT

Build and strengthen community partnerships through education and engagement to ensure the collaboration of all relevant stakeholders in promoting and protecting the community's health.

5

CONTINUOUS IMPROVEMENT

Routinely evaluate, monitor, and set measurable outcomes for improving community health status and the public health agency's/governing body's own ability to meet its responsibilities.

6

OVERSIGHT

Assume ultimate responsibility for public health performance in the community by providing necessary leadership and guidance in order to support the public health agency in achieving measurable outcomes.

IN OUR COMMUNITIES.

FOCUS ON COMMUNITY FOR HEALTH: STORIES FROM THE FIELD

CHILDREN'S SPECIAL HEALTH CARE PROGRAM

DHD#10 works with the Helen Devos Children's Hospital's Pediatric Endocrinology facility regularly to help provide diabetic education to clients and families. One nurse was working in collaboration with a particular family and their school. The client visited the RN with their blood sugar in the 300-400 range, and managed to get it down in the 170-180 range. Staff were able to secure a donated cell phone for the client to use their insulin pump. Staff also set up training through Devos on using the pump and additional Type 1 Diabetes training for the family and school staff.

SCHOOL-BASED HEALTH SERVICES

A 13-year-old client came to one of the DHD#10 school-based clinics for a routine sports physical. It had been two years since their last check-up. During the physical our clinician heard what she thought to be a heart murmur and provided a referral to Helen Devos Congenital Heart Center. The client's parents followed up with their PCP, who later referred the client to the Congenital Heart Center and that the cardiologist stated that finding the murmur saved the client's life. The client has recently been cleared to play select sports by the cardiologist. After coming back to DHD#10 for their sports physical, a parent of the client gave our clinician a tear-filled hug of appreciation.

COMMUNICABLE DISEASE CONTROL: TB

In June 2021, DHD#10 received a referral of a suspect & eventual case of Active TB with on-going symptoms. Staff investigation to determine exposure led to a conclusion the client had latent, untreated TB for years. Staff met with the client providing translation services to assure an understanding of the treatment plan, isolation to prevent transmission, and provided disease education. Active TB requires RN Direct Observation of Treatment (DOT) daily for two full weeks. After that, DOT switched to weekday RN video DOT for the next nine months, along with monthly home visits for a full assessment and weekly sputum collection. In addition, two coworkers and a family member tested positive and the same treatment regimen launched. From start to finish this was a daily 9-month process to support prevention of further community spread.

A background image showing a person's hand on a bicycle handlebar. Overlaid on this is a large light blue circle containing the title 'DIVISION HIGHLIGHTS' and a subtitle. Four smaller dark blue circles are connected to the main circle by thin white lines, each containing a division name. The background is a blurred outdoor scene with a paved path and greenery.

- 51 New Employees
- 70 Employees retired/left the agency
- 70 New Computers
- Upgraded Software to increase efficiency

Administration Updates

- Achieved State Accreditation (MDHHS)
- Application for National Accreditation submitted
- 130 press releases and 730 Facebook posts produced by the Media-Marketing-Materials Team
- Realigned Organizational Structure
- Succession Planning & Leadership Development Launched
- Public Health Workforce Interests and Needs Survey (PHWINS)

Regional Planning Department

- Secured over \$1.6 million in grant funding to support local and regional efforts to improve community health
- Staffing support to the Northern Michigan Community Health Innovation Regions (NMCHIR)
- Published the DHD#10 Community Health Assessment Report
- Launched development of three regional Community Health Improvement Plans (CHIP)

PUBLIC HEALTH DATA

The following is an in-depth view of the health of residents within the jurisdiction of District Health Department #10. This information also highlights data related to the programming and services provided to residents in our communities. These data sets are used to tell the story of each county's health status. DHD#10 continuously collects and analyzes data to identify the burden of disease and examine the overall health of the 10-county population. DHD#10 uses this data to ensure that programs and services are meeting the needs of clients and the communities served.

LEADING CAUSES OF DEATH

	DHD#10 Number of Deaths	DHD#10 Age-Adjusted Death Rate per 100,000	Michigan Age-Adjusted Death Rate per 100,000

COMMUNICABLE DISEASE TRENDING DATA

Chlamydia continues to be our most reported communicable disease. Likewise, it is the most common disease reported in our state. Our cases have been decreasing for two fiscal years, going from 617 cases in 2019/20 to 607 cases this fiscal year (2020/21). This decline in cases occurred in both our jurisdiction and the state of Michigan.

Gonorrhea cases have been increasing each year for the past eight years. The 5-year average trend is an increase of 31.9% per year.

Chronic Hepatitis C will continue to be a major health problem. Our reported cases have shown a 5-year average decreasing trend of 15.7% per year. This is likely due to changes in diagnostic criteria and more accurate diagnoses, which utilize RNA testing for virus confirmation.

Salmonella continues to be one of our primary food borne illnesses, with an increasing 5-year average trend of 9.5% per year. There were no salmonella outbreaks in our jurisdiction this fiscal year, however there was one foodborne illness related outbreak of norovirus.

Campylobacter is our most reported bacterial gastrointestinal disease this fiscal year. CDC estimates that it affects at least 1.5 million people a year in the US. The 5-year average trend for this disease is a decrease of 4.6% per year.

DISEASE	2021-2022	2020-2021	2019-2020	2018-2019
Chlamydia	588	607	617	740
Hepatitis C (chronic)	88	87	86	176
Campylobacter	56	39	35	44
Chicken Pox	2	2	5	8
Salmonellosis	47	28	35	32
Gonorrhea	99	192	127	92
Streptococcal Diseases	37	21	30	56
Shiga Toxin E coli	14	9	5	5
Giardia	13	18	11	12
Pertussis	5	0	9	8
Hepatitis A	0	12	1	8
Lyme Disease	45	23	13	28

Pertussis - There were no pertussis cases reported this fiscal year. Pertussis cases vary widely year-to-year due to periodic outbreaks, mainly in groups of unimmunized persons. Vaccination is the most effective means to prevent this disease and varicella (chicken pox) disease as well.

Shiga Toxin E coli cases increased this year with 9 reported. This disease can be severe, especially in children.

Hepatitis A cases increased during this fiscal year.

Lyme Disease is endemic in the counties along the Lake Michigan shoreline. There was a 76.9% increase in cases when comparing this fiscal year to last. Cases this fiscal year were primarily in two of our coastal counties of Mason and Oceana.

Additional comments:

Novel coronavirus COVID-19 continued as the predominate communicable disease this fiscal year. It is important to acknowledge that many of the preventative measures taken to decrease the spread of COVID-19 could have impacted other communicable disease case reporting thus impacting their trends as well.

Even though some diseases (such as TB and Meningococcal Meningitis) occur quite rarely, and do not appear on this list, they can create a large amount of work for our staff given the right circumstances. Therefore, the large numbers of certain diseases (e.g., Chlamydia; Chronic Hepatitis C) do not always properly tell the story of how much effort is required to investigate some of these diseases.

2022 COMMUNITY PARTNERS

DHD#10 recognizes all of the partnerships and support we receive from numerous outside agencies. With so much cross-jurisdictional sharing, partnerships, and support, we are able to continue offering unique programming and comprehensive public health services to our entire 10-county jurisdiction.
